Influential Member Joins the Omni Sulphur Group

Nipomo, California – May 26, 2008 – Omni Sulphur and Omni Agri Group, a full service development company for fertilizer-based project opportunities worldwide is pleased to announce the addition of Mr. Patrick M. H. Lumley to their company. Beginning immediately, Mr. Lumley will be serving in the role of Technical Director for the Omni Sulphur Group where he will primarily focus on servicing sulphur clients and projects, an area that is experiencing strong growth.

Mr. Lumley comes to Omni Sulphur with a strong management and technical background in mechanical and process systems, specializing in plant design, equipment, sulphur projects and operation of a plant. Mr. Lumley has been a consultant and project manager for several large companies including TengizChevroil, Hazco Environmental Technologies, Enersul Limited, Moore Agricultural Products and Tiger Industries. During the past decade, Mr. Lumley has been credited with planning, designing and growth development for projects exceeding 400 million dollars. Mr. Lumley is a graduate of Southern Alberta Institute of Technology (SAIT).

“Mr. Lumley is a dynamic professional and we look forward to benefiting from his insights and experience as a member of the Omni Sulphur Group” said Mark Moore, Owner and CEO of Omni Agri and Omni Sulphur. “We are truly excited about having Mr. Lumley join our organization, as we are certain he will add an important dimension to our team.”

About Omni Agri & Omni Sulphur

Omni Sulphur provides turnkey technical, financial and marketing services for the construction and operation of sulphur bentonite and sulphur micronutrient plants, marketed under the name Omni-Drop Turnkey Sulphur Solutions. Omni Agri is a consulting company offering a broad spectrum of project development services including feasibility studies and business plans, negotiating site leases, managing engineering, procurement and construction programs as well as subsequent plant operations.
